Department of Computer Technology

Vision of the Department

To be a well-known centre for pursuing computer education through innovative pedagogy, value-based education and industry collaboration.

Mission of the Department

To establish learning ambience for ushering in computer engineering professionals in core and multidisciplinary area by developing Problem-solving skills through emerging technologies.

Session 2025-2026

Vision: Dream of where you want.	Mission: Means to achieve Vision

Program Educational Objectives of the program (PEO): (broad statements that describe the professional and career accomplishments)

PEO1	Preparation	P: Preparation	Pep-CL abbreviation
PEO2	Core Competence	E: Environment	pronounce as Pep-si-lL
		(Learning Environment)	easy to recall
PEO3	Breadth	P: Professionalism	
PEO4	Professionalism	C: Core Competence	
PEO5	Learning	L: Breadth (Learning in	
	Environment	diverse areas)	

Program Outcomes (PO): (statements that describe what a student should be able to do and know by the end of a program)

Keywords of POs:

Engineering knowledge, Problem analysis, Design/development of solutions, Conduct Investigations of Complex Problems, Engineering Tool Usage, The Engineer and The World, Ethics, Individual and Collaborative Team work, Communication, Project Management and Finance, Life-Long Learning

PSO Keywords: Cutting edge technologies, Research

"I am an engineer, and I know how to apply engineering knowledge to investigate, analyse and design solutions to complex problems using tools for entire world following all ethics in a collaborative way with proper management skills throughout my life." *to contribute to the development of cutting-edge technologies and Research*.

Integrity: I will adhere to the Laboratory Code of Conduct and ethics in its entirety.

Name and Signature of Student and Date

(Signature and Date in Handwritten)

Department of Computer Technology

Vision of the Department

To be a well-known centre for pursuing computer education through innovative pedagogy, value-based education and industry collaboration.

Mission of the Department

Session	2025-26 (ODD)	Course Name	HPC Lab
Semester	7	Course Code	22ADS706
Roll No	03	Name of Student	Debasrita Chattopadhyay

Practical Number	01
Course Outcome	1.Understand and Apply Parallel Programming Concepts
	2. Analyse and Improve Program Performance.
	3. Demonstrate Practical Skills in HPC Tools and Environments.
Aim	Introduction to Linux and HPC Environment
Problem Definition	Implement basic Linux commands and understand HPC Environment
Theory (100 words)	Linux is an operating system based on the Unix operating system and open-source. Its open-source features, stability, flexibility, and security have made it a popular choice for research and server environments. Linux gives you the ability to support multiple users, and multitasking, and does so reliably, which can be advantageous in a high-stress environment.
	High-Performance Computing, or HPC, refers to the function of supercomputers and computing clusters to solve problems requiring substantial computing capabilities. Instead of using a single, capable processor, HPC takes as many as thousands of processors in parallel to complete large-scale simulations, surveys and scientific research tasks such as weather prediction, molecular modelling, and machine learning.
Procedure and	Step 1: Understand Linux Basics
Execution	pwd → show current directory
(100 Words)	ls → list files
	cd → change directory
	cp, mv , $rm \rightarrow copy$, move, delete files
	chmod, chown → change permissions/ownership
	top, htop → monitor running processes
	Step 2: Explore the Linux File System Step 3: Work with the Shell
	Use shell interpreters (e.g., bash, zsh) for command execution.

Department of Computer Technology

Vision of the Department

 $To \ be \ a \ well-known \ centre \ for \ pursuing \ computer \ education \ through \ innovative \ pedagogy, \ value-based \ education \ and \ industry \ collaboration.$

Mission of the Department

To establish learning ambience for ushering in computer engineering professionals in core and multidisciplinary area by developing Problem-solving skills through emerging technologies.

Step 3: Linux in HPC Environment

5.1. Use Linux as the primary OS in HPC clusters due to efficiency and flexibility.

Step 4: Resource Management

6.1. Learn about job scheduling systems (e.g., SLURM, PBS, LSF).

Commands

cd HPC

touch first.sh

1s

mkdir YCCE

1s

expr 5+3

touch prog.txt

touch first.txt

cat first.txt

cp first.txt second.txt

cat second.txt

ps

lscpu

sort first.txt

cal August 2025
